

## 云南石斛属一新变种\*

马国祥 徐国钧 徐珞珊

(中国药科大学生药教研室, 南京 210009)

A new variety of *Dendrobium* from Yunnan Ma Guo-Xiang, Xu Guo-Jun and Xu Luo-Shan (China Pharmaceutical University, Nanjing 210009), *J. Plant Resour. & Environ.* 1992, 1(4):64

A new variety of *Dendrobium chryseum* Rolfe var. *bulangense* G. X. Ma et G. J. Xu from Yunnan was reported. Observation on *Dendrobium chryseum* and the new variety in morphological characters also showed they were different.

关键词 布朗山石斛

Key words *Dendrobium chryseum* Rolfe var. *bulangense* G. X. Ma et G. J. Xu;

### 布朗山石斛 新变种

*Dendrobium chryseum* Rolfe var. *bulangense* G. X. Ma et G. J. Xu, var. nov. A typo differt planta manifeste nana, 25~35 cm alta; foliis apice minusve hamatis; labello reniformi purpura nulla vel obscura

Yunnan: Menghai, alt. 1100 m, 20. May 1991, G. X. Ma 91021 (Holotype, deposited in Herb., China Pharmaceutical University)

新变种和原变种的区别在于:植株显著矮小,高 25~35 cm;叶先端钩转;唇瓣上无肾形紫色斑块或紫色斑块不明显。

云南:勐海县,布朗山,海拔 1100 m,1991.05.20,马国祥 91021(模式,存中国药科大学标本室)

新变种和原变种在组织结构上差异亦较大;新变种基本薄壁细胞中无针晶束,而原变种针晶束易见;新变种维管束内方大多具纤维群,而原变种维管束内方大多无纤维群。
